

Innovations In Learning is accepting referrals for

Music Therapy

What is Music Therapy?

Music Therapy is the clinical and evidence-based use of music interventions to accomplish individualized goals within a therapeutic relationship. Music Therapy is provided in individual and group settings.

Music therapy can address the following skill areas:

Communication Skills

Academic Skills

Cognitive/Memory skills

Gross/Fine Motor Skills

Emotional Skills/Coping

Social Skills

Self-Expression

What can you expect from a Music Therapist?

Your music therapist will complete an individualized assessment to determine specific goals for treatment. The music therapist will then complete a treatment plan and determine specific music therapy techniques to utilize during sessions. Through musical involvement in the therapeutic context, clients' abilities are strengthened and transferred to other areas of their lives.

Why is Music Therapy effective?

Music is a highly motivating medium. In the music therapy session, many different senses are stimulated, including auditory, tactile, and visual, therefore creating a multi-sensory approach to therapy. This multi-sensory approach creates an avenue for addressing a variety of developmental areas.

How is Music Therapy funded?

Music Therapy services are funded through Indiana Medicaid Waiver and self-pay.

Who should you contact if interested in Music Therapy services?

Contact Jennifer Ferrara at 219-791-1400, ext. 111, or at jferrara@innovationsinlearning.net
